

UNIT  
**3**

**ANIMALS ARE DIFFERENT**

**REVIEW**

**A**

**Animals Are Special**

All animals are different.

They are different in size, some are big while others are small.

Their diets are different. Some eat only plants while others eat only meat. There are some animals which eat both plants and meat.

They are also different in colour and appearance.

Some animals are kept as pets at home while others are used to work on farms.

Animals are special in their own way.
